ABOUT

TENER is a German music producer, songwriter, and audio engineer.

He began producing music at an early age and has since developed a sound defined by precision, emotional depth, and modern production aesthetics. During a livestream hosted by Protocol Recordings, his work drew immediate attention and received direct praise from Nicky Romero, who highlighted the production quality and supported further industry connections.

Following this, TENER worked as a ghost producer and audio engineer for international clients, while also achieving multiple Top-10 placements in international remix competitions across various genres, including a first-place finish in techno — reflecting both stylistic versatility and technical consistency.

Currently, TENER is focused on developing his debut. His approach is defined by analytical depth and creative authorship, enabling the independent creation of studio-grade vocals and sound design with a level of consistency, efficiency, and control that remains uncommon within the industry.

SKILLS & WORKFLOW

Music Production & Composition

Original compositions and productions with a strong focus on structure, detail, and sonic consistency across electronic and cinematic contexts.

Sound Design

Creation of synthetic and hybrid sound design elements, ranging from subtle textures to character-defining lead sounds and atmospheres.

Studio-Grade Vocals (Independent Workflows)

Development and integration of studio-quality vocal material through advanced, independent production workflows, enabling flexible iteration without reliance on traditional recording sessions.

Audio Engineering & Final Delivery

Clean, release-ready mixes with attention to balance, translation, and professional delivery standards.

Advanced AI-Assisted Production Workflows

Deliberate and systematic integration of AI (such as FASTERMASTER) into the production process to accelerate iteration, enhance sound creation, and maintain full creative authorship and control.
